WHAT IS BLEED?

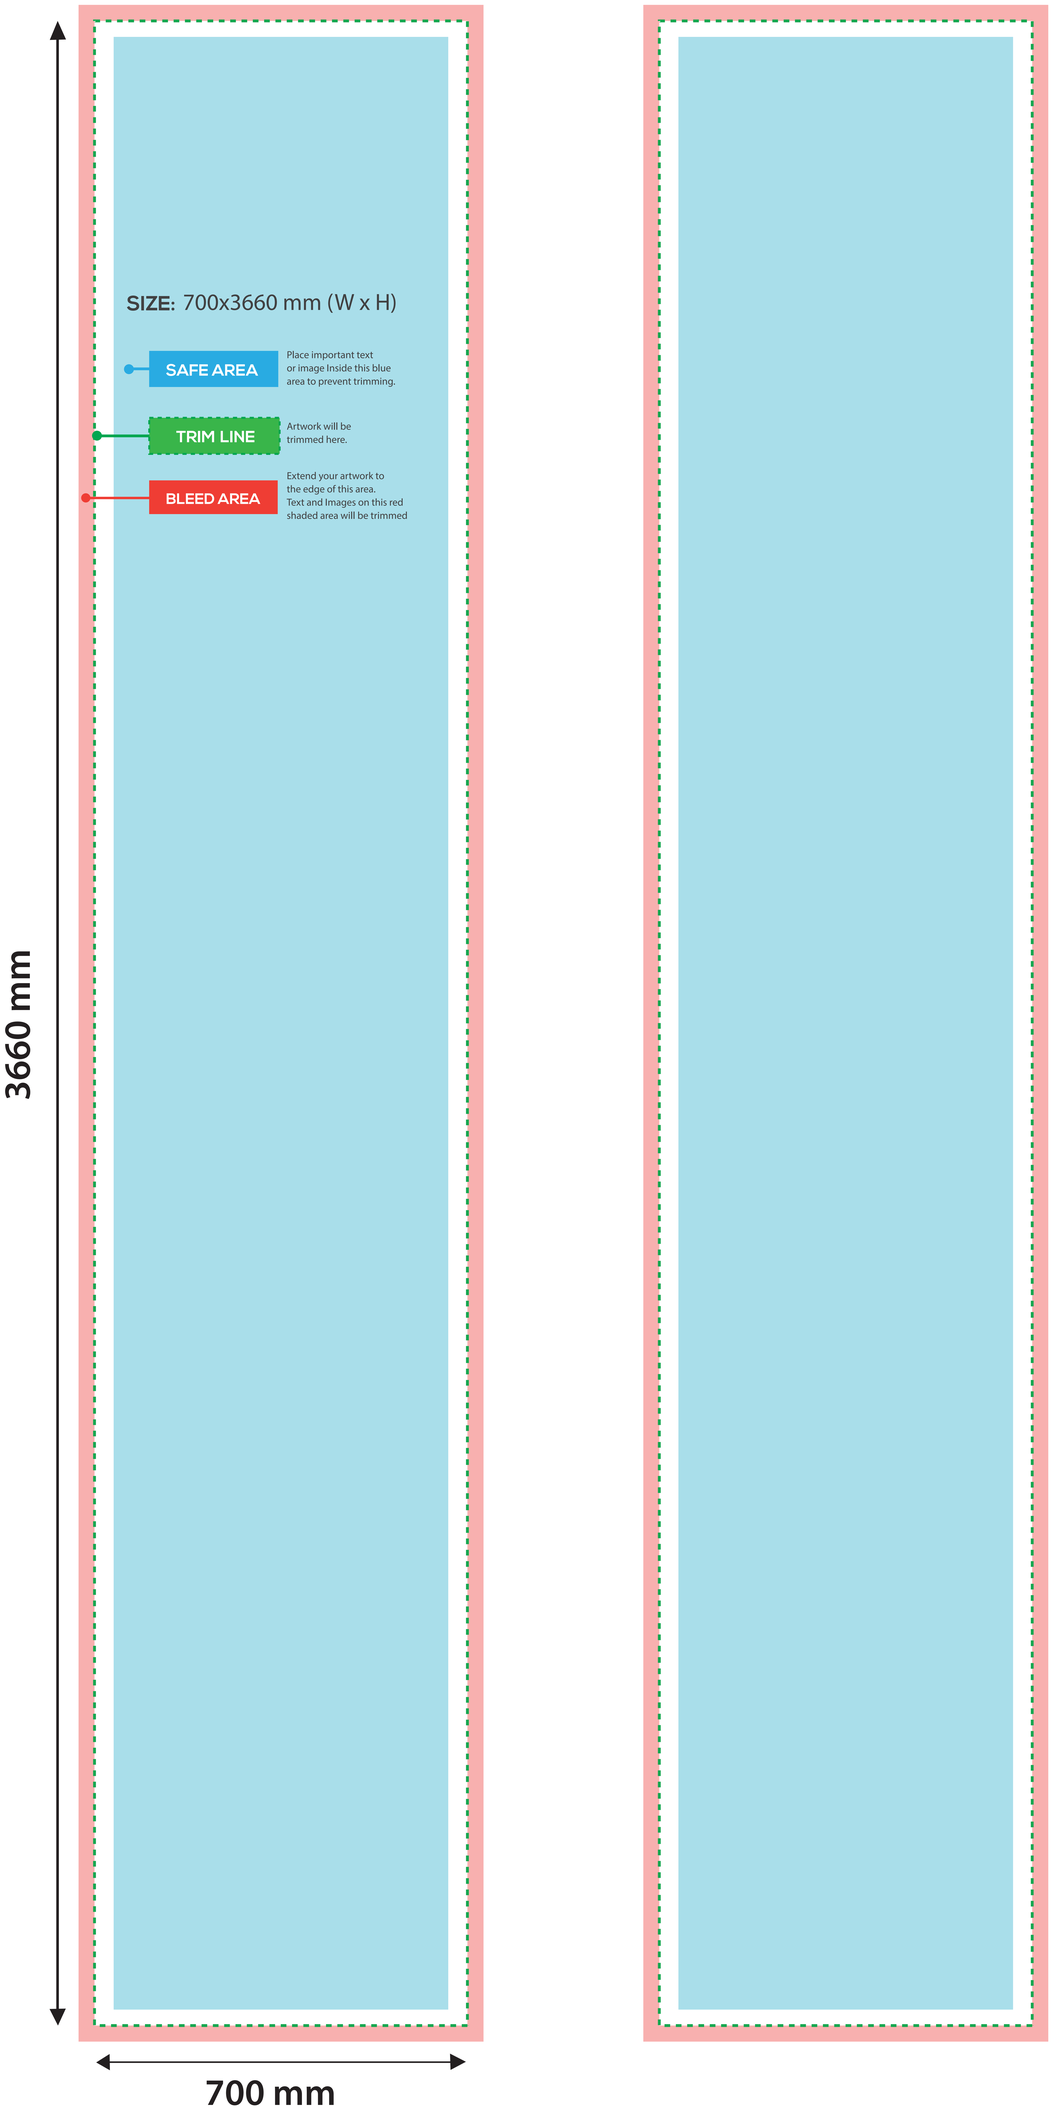

When designing for print it is important to remember that it can be difficult to trim a job right on the edge of a design. In order to achieve the best result possible, you will need to extend your design past the trim lines, so the design can easily be cut down to size. The area that extends past your trim lines is called 'bleed'. In order to get the best results when designing for print, it's important to ensure your artwork always extends past the trim lines.

EXTRA LARGE RECTANGULAR BANNER FLAG

For single side print, place artwork here.

For double side print, place artwork on both.

Please delete this layer before sending back to us.
